

## Conservation

In these activities we want you to consider how best to save our wonderful world, for the next generation, by doing what you can to encourage plant growth, protect animals and discourage waste.

### Level 1

Complete 4 of these activities

- Save seed heads and plant the seeds
- Plant insect friendly flowers in tubs or pots
- Make an insect home
- Find out about hedgehogs and how you can help them
- Make fat balls for birds
- In the autumn make a hedgehog nest in a pile of leaves ready for hedgehogs to hibernate in

### Level 2

Complete 4 of these activities

- Take part in an official counting day e.g. birds, butterflies, ladybirds
- Make bird feeders
- Grow wild flower patches in the garden or pots
- Find out about your local recycling site
- Make up an outdoor game about an endangered species and play it
- Make a rainwater collector and use it to collect rainwater for your garden. Keep a record for two weeks of the amount you have collected
- Explore a wild flower meadow and see how many flowers you can identify. Are there any rare flowers there?

### Level 3

Complete 4 of these activities

- Make up an outdoor game about an endangered species and play it
- Marine animals are in danger and people are trying to set up Marine Conservation areas. Find out about them and see how you can help
- Collect scrap paper and make your own paper outside (as it is a very wet process!)
- Protect frog and toad spawn by clearing ponds
- Make a bird nesting box
- Make a bat nesting box
- Pick wild fruit and make jam
